

ELECTRICAL FOUNDATIONS

Houston 2015

New Industries are coming to the Northwest!

ELECTRICAL 2015 PROGRAM OVERVIEW

The Foundations Electrical program prepares students for entry-level positions as apprentices with electrical contracting companies involved in residential, commercial and industrial construction and maintenance. Graduates might also find positions with manufacturing and resource development firms (mining, oil & gas, forestry etc.).

PROGRAM OUTLINE

The program is competency based and classes and shop time are scheduled Monday – Friday. The program delivers the complete theoretical and practical outcomes of the provincially accredited level 1 Electrical Work apprenticeship program.

For more information see the Industry Training Authority Website: www.itabc.ca

For more information regarding admission requirements and program fees see the Northwest Community College website: www.nwcc.bc.ca

For Ace-It students interested in applying, please contact your school counselor to get started.

CAREER OPPORTUNITIES

There are over \$30 Billion in major projects and investment opportunities planned in our region! The time is now to train for the influx of Trades jobs. Here are just a few projects starting up in our geographic area that are expected to require skilled workers:

- Proposed LNG Projects
- Ridley Terminals Expansion
- Kitimat LNG and Pacific Trails Pipelines

THE FUTURE IS NOW, APPLY TODAY!

Information subject to change. See Web site for up-to-date information.
